

## HDMI SWITCHER

Category : AUDIO/VIDEO-CABLES AND ADAPTERS

The HDMI SWITCHER is a HDMI HUB that allows you to connect your console or dvd player or any hdmi related device to a tv and easily switch from a device to another with a simple remote control press.

With the simple press of a button, on the supplied remote control, you can select one of the four HDMI inputs. The HDMI switch box will then route your selection to your high definition display, without any signal degradation. The HDMI Switch Box is guaranteed for resolutions up to 1080p and also supports long HDMI cables, again with no loss of signal quality.
